Dear Sir,

I am writing to express my interest in the Software Developer position with your esteemed organization. With a strong background in software development and a keen ability to work alongside cross-functional teams, actively participated in the continuous discovery of new software solutions, ensuring a thorough understanding of real world problems to drive Digital Solution in Form of Web, Mobile and Desktop Applications For instance, I have worked on the following applications:

1. Vehicle Management System (VMS GPS, GeoFencing)
2. Human Resource Management System (HRMS)
3. Customer Relationship Management (CRM) System
4. Enterprise Resource Planning (ERP) System
5. Inventory Management System
6. E-commerce Platform with integrated payment gateways
7. Learning Management System (LMS)
8. Project Management System
9. Booking and Reservation System
10. Content Management System (CMS)
11. Fleet Management System
12. School Management System
13. Point of Sale (POS)
14. Dynamic websites and mobile applications
15. Attendance Management System

Programming Language

Core programming languages to build interactive software solutions, seamlessly integrating backend processes with data management and developing engaging user interfaces.

- **Java**: Essential for Android application development.
- **PHP**: Widely used for web development.
- **JavaScript**: Key for both backend server-side and front-end development.
- **Python**: Utilized for computer vision, data science, face recognition, AI, and machine learning.

Education Background

- **Educational Background:** Master's Degree computer science (MCS 3.20 CGPA)
  Attested Ministry Of Foreign Affairs & HEC Pakistan
- **Experience:** Over 8 years of coding experience in Internet systems, with a preference for candidates with a background in the Business Applications
- **Language Skills:** Fluent in English, with strong reading and communication abilities.
- **Technical Knowledge:**
- Solid foundational knowledge in computer science.
- Familiarity with various programming paradigms.

1- Mighty Warner's Technology – Full Stack Developer
March 2022 – Present | https://www.mightywarner.ae/
Best Digital Marketing Company in Dubai

Projects

I had great experience learning programming language python from Sir Nabeel Javed , the way he explains , how he takes the matter deep makes you in love with it , another plus point is that he is very interactive throughout the lesson and he checks to make sure whether the student has grasped the concept or still needs some refinement.

Response from the owner 3 weeks ago
Thank you so much for your kind words! We're thrilled to hear about your positive experience at Zabeel Institute. Our team works hard to provide excellent education and support to all our students. We appreciate your recommendation and look forward to welcoming you back in the future

Software Practices & Methodologies

- **Agile Development Methodology**: Enhances team collaboration and flexibility through iterative cycles, adapting quickly to changing requirements.
- **Waterfall Development Methodology**: Manages projects with a structured and sequential approach, benefiting projects requiring thorough documentation.
- **Rapid Application Development (RAD)**: Focuses on rapid prototyping and iterative testing to reduce development time and incorporate user feedback swiftly.
- **DevOps Development Methodologies**: Integrates principles to streamline development and deployment, improving CI/CD and overall system reliability.

DBA - Database Administrator

Proficient in SQL, data modeling, ER diagrams, data integrity, and security. Experienced in managing data structures and ensuring efficient and secure database operations.

Technology Stack

- **React**: JavaScript library for building user interfaces, particularly single-page applications.
- **Flutter | React Native**: UI toolkit for building natively compiled applications for mobile, web, and desktop from a single codebase.
- **Node.js**: JavaScript runtime for building scalable server-side applications.
- **.NET Windows Forms**: Framework for developing Windows desktop applications with a graphical user interface.
- **Laravel**: PHP framework for web application development, following the MVC pattern.
- **WordPress, Wo-commerce**: Content management system (CMS), **E-Commerce** for building and managing websites and blogs.
- **Python Django**: High-level Python web framework for building robust web applications quickly.
- **Python Flask**: Lightweight Python web framework for creating web applications with simplicity and flexibility.
- **Python Data Analysis**: Utilizing Python libraries for data manipulation and analysis, such as Pandas and NumPy.
- **Java**: Programming language used for developing Android mobile applications.

Salary Expectation

I would like to mention that my current salary is AED 5,000, inclusive of all transport and housing allowances. I am seeking a similar compensation package, as, I hold a freelance visa valid until July 2025 and possess a Master's degree in Computer Science, along with extensive experience in Development which adds value to the candidacy.
